

# Revicoll Omega Plus + Vitamin K2 MK-7

A multifunctional blend that significantly supports the functioning of the cardiovascular and skeletal system. It contains a high concentration of Omega 3 fatty acids, amino acids, peptides and fish collagen. The effects of calcium and vitamin D, available in Revicoll, are complemented by vitamin K2 MK-7 in order to work properly. A complementary supplement, rich in a wide range of minerals and elements, which the body cannot synthesize itself and must provide via food from the outside.

8in1

## WHAT DO REVICOLL OMEGA PLUS + VITAMIN K2 MK-7 CAPSULES CONTAIN ?

### **Ω<sup>3</sup> Omega 3 Acids (DHA and EPA)**

a decrease of harmful LDL cholesterol and triglycerides, an increase of beneficial HDL cholesterol • a reduction in blood clotting (protection of the heart and cardiovascular system) • proper brain function • building cell membranes • proper functions of the retina • treatment of rheumatoid arthritis and degenerative diseases of the connective tissue • anti-inflammatory effect – cancer prevention
