

# SYN AKE EYE & MORE

An intensive active point serum for under the eyes and for mime wrinkles

## It contains the Biopeptide

**Complex** – a complex of bioactive fish collagen peptides and the **SYN®-AKE** – a neuropeptide that imitates the properties of the viper (Temple Viper) venom toxin, which **relaxes and inhibits muscle contractions, containing thusly mime wrinkles.**

A product's rich composition **rejuvenates and nourishes** a sensitive skin around eyes, **provides high moisture level** and thanks to microcirculation stimulating components, it visibly **lightens up the shades and removes edema.**

Already after 30 days of treatment, the serum provides a visible effect of smoothening, firming and moisturizing the skin

Mime wrinkles get shallowed and the creation of new ones is more difficult

The look is rested, brighter and the around eyes area is nourished

**SYN AKE EYE & MORE** acts like a concealer for under the eyes and in the areas affected by mime wrinkles
